在宏觀變局中穩健前行：美國經濟展望分析

關稅及其對宏觀經濟環境的影響，加上美國政府政策對公共開支的影響，似乎是當前影響市場的主要因素。例如美國總統特朗普於7月4日正式簽署並生效的「大而美法案」（One Big Beautiful Bill），延續了2017年的減稅措施， 小費與加班收入免稅，並對國防和移民執法新增1,560億美元的巨額支出。 儘管波動性上升，投資團隊仍維持審慎樂觀的展望。美國消費者支出增速略為放緩，但仍然保持健康水平，而製造業的就業水平回穩並開始好轉，健康護理業的就業人數則持續錄得增長。美國勞動力市場在六月仍然保持強勁，新增了147,000個工作崗位，失業率回落10個基點至4.1%，而核心個人消費支出（PCE）物價指數在最新數據中從上個月的2.5%回升至2.7%。投資團隊預期就業人數增長將會放緩，但仍然維持正增長，可避免消費者支出大幅下跌。鑑於整體就業市場仍屬健康，投資團隊認為因政府效率部的減省成本計劃而被裁減的聯邦政府人員有望由私營機構吸納。

由於美國聯邦基金利率仍處於約4.25%至4.50%的水平，一旦勞動市場轉弱，聯儲局仍有空間透過放寬貨幣政策為美國經濟紓困。只要長期通脹預期仍然穩定，投資團隊認為若出現失業率上升及貿易關稅推高物價的情況，聯儲局仍有可能大幅減息。

股票：估值重估釋放投資潛力

在美國股市方面，投資團隊認為市場價格已大致反映關稅的影響。對於大多數受波及的企業而言，盈利的影響似乎是可控的。企業可透過替代採購、提高價格、削減成本或爭取豁免關稅，以抵銷相關壓力。投資團隊認為，最強韌的企業有足夠規模在全球攤分上漲的成本、調整採購及與供應商合作，以抵銷關稅影響及維持競爭優勢。

隨著市場明顯由週期性股票轉向防守型的板塊，一些週期性及增長導向的板塊受到市場波動的影響較大 (見圖一)，較年初回落7.91%。投資團隊認為現時估值已具吸引力，並看好貿易壓力較低的行業，以及受惠於長期結構性趨勢的行業，例如人工智能和健康護理。

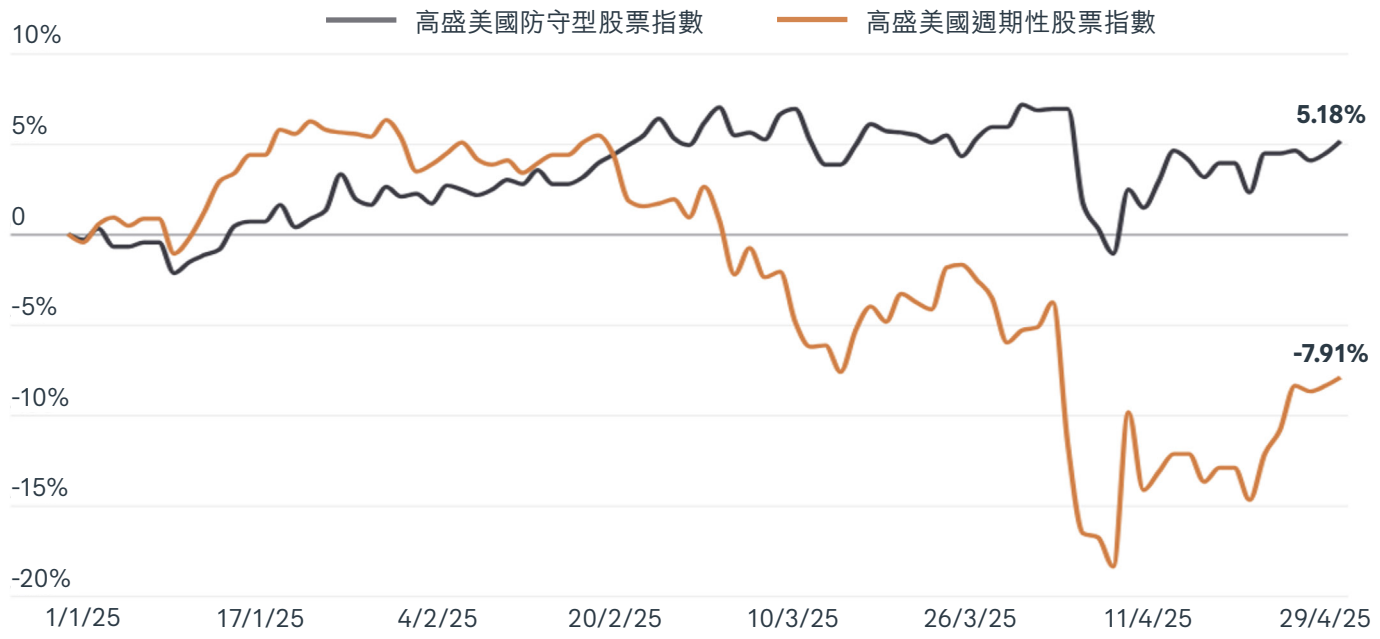
圖一：表現輪動：週期性轉向防守型板塊



資料來源：彭博，截至2025年4月29日。累計總回報自2025年1月1日至2025年4月29日。
過往表現並不保證未來趨勢會持續，亦不保證預測會實現。

債券：在波動市況中有效管理風險

在美國固定收益市場，多個板塊目前提供吸引的中高單位數收益率及近期信貸息差擴闊令估值更具吸引力。最新數據顯示，美國投資級債券收益率目前徘徊在5.15%，近71個基點的信用利差。投資團隊認為，在當前環境中最大化風險調整後回報並降低回撤風險非常重要。投資團隊認為，在當前環境下，盡可能提高風險調整後收益並減低下行風險尤為重要。

市場目前更注重「利差」和債券選擇，投資者可透過票息相對較高的持倉，並挑選風險或回報預期偏向正面的個別債券來獲得額外回報，而非以宏觀經濟為投資理據。固定收益資產再次展現出與股票的低度或反向相關性，以及與利率及信貸利差的反向關。投資團隊認為，這兩者結合對於在難以預測時期管理波動性至關重要。如果美國勞動力市場進一步疲軟，聯邦基金利率最快可能在9月減息，利好債券表現。

人工智能：科技滲透至最傳統的體育場地

2025 年對溫布頓網球錦標賽而言是一個歷史性的轉變。147年來首次，人類司線員已被電子司線（ELC）技術所取代。這是溫布頓在採用新科技方面的最新一步。就如同許多科技採用週期一樣，變化的速度呈指數式增長。在錦標賽最初的 130 年裡，幾乎沒有使用任何科技。2007年引入的鷹眼系統，監察超過300名司線員的判決。18年後，即使是在最傳統的體育場地，世界也迎來了科技完全取代一個擁有逾百年歷史角色的時刻。這雖然是網球運動中更廣泛科技革命的一部份，但同時也為當前有關人工智能革命的討論提供了啟示，尤其是關於它可能取代大量人類工作的風險。

從投資角度來看，理解這場劇烈的科技轉折點至關重要。能夠適應這些變化並實施正確策略的公司，將是投資者識別 AI 時代領導者的關鍵。投資團隊預期這些企業亦將主導未來的股市。作為資產管理人，投資團隊有責任在這段旅程中與這些公司積極互動，協助它們負責任地發展技術，並應對必然隨之以來的監管挑戰。

MONTHLY NEWSLETTER

July 2025

Information contributed by: Janus Henderson

Navigating Macroeconomic Shifts: U.S. Economic Outlook

Tariffs and their impact on the macroeconomic environment, along with the US administration's policy impact on government spending, seem to be the biggest market factors today. For example, Trump's One Big Beautiful Bill, which signed into law on July 4th, extends the 2017 tax cuts, provides temporary tax relief for tip and overtime income, and massive new spending of $156 billion on defense and immigration enforcement. Despite increased volatility, the investment team maintains a cautiously optimistic outlook. US consumer spending has shown modest deceleration but remains healthy, while manufacturing employment has stabilized and begun improving and the healthcare sector continues to add jobs. The US labour market remained strong in June with 147,000 jobs added and unemployment rate decreasing by 10 bps to 4.1%, while the core personal consumption expenditure (PCE) rebounded to 2.7% in the latest data compared to the previous month at 2.5%. The investment team expects job growth to slow but remain positive, avoiding significant deterioration in consumer spending. With the overall job market being reasonably healthy, the investment team thinks federal government headcount reductions caused by the Department of Government Efficiency's (DOGE) cost cutting plan will likely to be absorbed by the private sector.

With the federal funds rate still around 4.25%-4.50%, the Fed remains well positioned to provide relief to the US economy by way of easier monetary policy if labour markets weaken. As long as longer-term inflation expectations remain well anchored, the investment team believes the Fed will still cut rates aggressively if it faces a scenario of higher unemployment coupled with higher prices driven by trade tariffs.

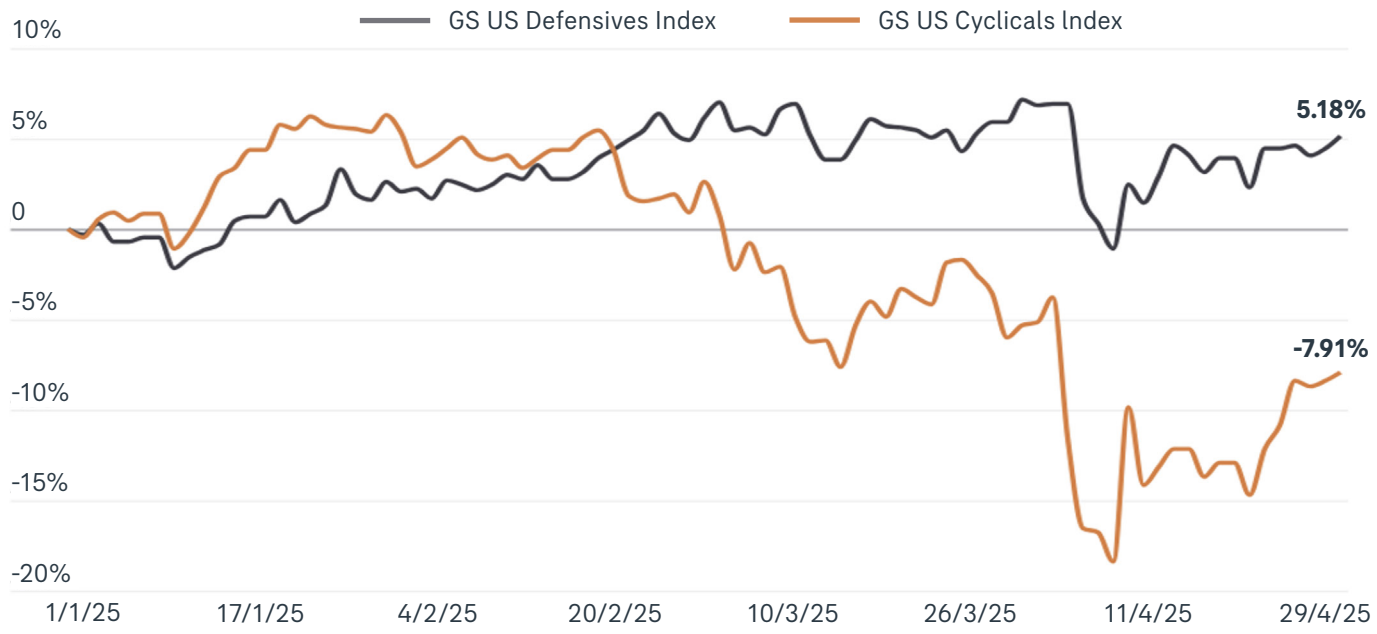
Stocks: Valuation Re-rating Unlocks Investment Potential

In terms of US equities, the investment team believes the tariff impact is largely reflected in market prices. For most affected companies, the earnings impact appears manageable. Companies can offset these pressures through alternative sourcing, price increases, cost reductions or potential exemptions. The investment team believes the most resilient companies will be those with scale to split cost increases globally, adjust sourcing, and work with suppliers to offset tariff impacts while maintaining competitive advantages.

Given the significant switch from cyclical to defensive stocks, certain cyclical and growth-oriented segments have been disproportionately affected by volatility and now appear attractively valued (see Chart 1) after 7.91% year-to-date correction. The investment team favours opportunities in sectors less exposed to trade pressures and those benefiting from long-term structural trends like AI and healthcare.

The above information is contributed by Janus Henderson in July 2025 and shall not represent AIA's views.

Chart 1: Performance Rotation From Cyclicals To Defensives



Source: Bloomberg, as of 29 April 2025. Cumulative total return from 1 January 2025 to 29 April 2025.
There is no guarantee that past trends will continue, or forecasts will be realized.

Fixed Income: Effective Risk Management Amid Market Volatility

In the US fixed income market, many sectors are currently offering attractive yields in the mid to high single digits and the recent widening in credit spreads has made valuations more attractive. The latest data shows that US investment-grade bond yields are currently hovering at 5.15%, creating a credit spread that is almost 71bps. The investment team believes it is important to maximise risk-adjusted return and reduce drawdown risks in the present environment.

The current market is more of a "carry" and bond pickers' market, in which investors are rewarded by clipping relatively high coupons and picking individual bonds with positively skewed risk/return expectations, as opposed to making macroeconomic bets. Fixed income assets have once again been exhibiting low or negative correlation to equities as well as negative rate spread correlation - which taken together the investment team views as essential to managing volatility during unpredictable times. Should the US experience more weakness in the labor markets, it is possible that cut in the Federal Funds rate could come as soon as September, and benefit the bond return.

Enabling AI: Technology Adoption At Even The Most Traditional Sporting Venues

2025 marks a historic change for the Wimbledon Championships. For the first time in 147 years human line judges are replaced by electronic line calling (ELC) technology. This is the latest evolution of Wimbledon adopting new technology. Like many technology adoption cycles, the rate of change is exponential as for the first 130 years of the championships, hardly any technology was used. The introduction of Hawk-Eye in 2007 provided oversight to the 300-plus line judges that helped officiate. 18 years later, even at the most traditional sporting venues, the world is now at the point of technology completely replacing a role with a storied history stretching back well over a century. While this is part of a wider technological revolution in the sport of tennis, it also provides insights into the wider debate around the AI revolution, and the risk of replacing many human jobs.

From an investment perspective, understanding this radical technological inflection, the companies that are best placed to adapt to these changes and are implementing the right strategies are key to identifying the leaders of the AI era – which the investment team expects to also dominate the stock market. It is our investment team's responsibility as stewards of investors' capital to engage with these companies in this journey to help them develop technology responsibly and to navigate the inevitable regulatory challenges.
